

Microsoft 365 Business Voice

Cloud-based phone system built for productivity

Staying connected in real time is essential. Unlock new business opportunities with a phone system designed for Microsoft 365.

Microsoft 365 Business Voice is an all-in-one communication solution for small and medium businesses (SMBs) that integrates into Microsoft 365—bringing together calling, meetings, and messaging into a single application, Microsoft Teams.

Quick Launch: Accelerate for Business Voice

Promote communication with our Accelerate program to enable Business Voice in your organization. The program includes designing best practices, migrating phone lines & building an adoption & training plan to jump start your journey to modern communication.

Work from anywhere, on any device

One phone number across your computer, mobile, and desk phone

Secure, reliable, & rich calling

Cloud calling features you can count on plus built-in redundancy & load balancing

All-in-one Solution

Bring together calling, chat, and meetings right within Microsoft 365

What's included:

Design best practices

Plan & design for productivity across the ecosystem; Business Voice is more than calls.

Migrate phone lines

We take care of getting new phone numbers or porting existing lines.

Train & adopt

Leverage custom resources and virtual trainings to onboard users quickly.

Our team is here to help you transition to Microsoft's modern voice solution. Give us a call to get started!
